

## Create a **discount** Custom Pipe

Create a **custom pipe** called: discount

### Requirements

1. The pipe should **reduce the price by a percentage**.
2. The **default discount should be 10%**.
3. The user should be able to **pass a different discount value**.

```
1000  {{1000 | discount}}  900
```

```
1000  {{1000 | discount:20}}  800
```

---

## Create a **appDisableAfterClick** Directive

Create a **custom attribute directive** called: appDisableAfterClick

### Requirements

The directive should:

1. Be applied to a **button**.
  2. When the user **clicks the button**, it becomes **disabled**.
  3. The button text should change to: **Processing...**
  4. **Allow the button to re-enable after 3 seconds.**
