

Abdulrahman Ibrahim

Full Stack Software Engineer

Cairo, Egypt ✉ abdo.ibrahim411@gmail.com ☎ Phone: +201202671449 🔗 LinkedIn: [abdo-ibrahim](#) 🐙 Github: [abdo-ibrahim](#) 🌐 [abdulrahman-ibrahim.me](#)

Work Experience

- **ITI Internship | MERN Stack Development | July 2024 – August 2024**
 - Built responsive MERN apps with clean architecture using TypeScript, React, Node.js, and MongoDB.
 - Improved React performance by 30% through optimized rendering.
 - Collaborated with a team of 5 to deliver scalable modular APIs.
- **TechnoHacks Internship | Web Development | July 2023 – August 2023**
 - Developed CRUD and Quiz apps using JavaScript and React with 20% cleaner code
 - Built a responsive landing page with React & Tailwind, boosting engagement by 15%.
 - Enhanced app performance using DSA-based optimizations.

EDUCATION

Information Technology Institute (ITI) – Ministry of Communications and Information Technology Open-Source Applications Development Track (9-Months Professional Program) | Oct 2025 – Present

Bachelor of Computers and Systems Engineering Zagazig University | 3.32 GPA (83%) | Sep 2020 – Jul 2025

- Related Courses: C, Java OOP, Algorithms and Data Structures, Database, Operating Systems, Artificial Intelligence (AI, NLP), Computer Networks, Logic Design, Computer Architecture and Organization, Embedded Systems.

PROJECTS

- **AreebEvent – Event Booking Platform (Full-Stack)** [Demo](#) | [GitHub Link](#)
 - Developed a full-stack platform for browsing, booking events, and managing users via an admin dashboard.
 - Implemented secure authentication with JWT and cookies, and enhanced UX via responsive design and multi-language support.
 - Tools: React.JS, TypeScript, Tailwind CSS, Shadcn UI, Redux Toolkit, Context API, Node.js, Express.js, MongoDB, JWT.
- **Crop Guard – Graduation Project** [Live Demo](#)
 - **Project Description:** Crop Guard is an agricultural platform that helps farmers detect diseases, predict risks, and get recommendations to improve productivity and reduce losses through AI, web, mobile, and embedded systems.
 - **My Role:** Frontend Development & UI/UX.
 - Developed the frontend of an agricultural platform with Next.js and TypeScript, including a dynamic dashboard, e-commerce, and community features, optimized for responsiveness, accessibility, and SEO.
 - Designed modern UI/UX with smooth animations using Framer Motion and created reusable components with Shadcn UI.
 - Managed state and API integration using Redux Toolkit, Context API, and Axios, ensuring smooth data flow and real-time updates.
 - Tools: Next.js, TypeScript, Tailwind CSS, Shadcn, Redux Toolkit, Context Api, RESTful Api, Framer Motion, HTML, CSS.
- **E-Commerce RESTful API (Backend)** [GitHub Link](#)
 - Built a full E-Commerce REST API with authentication, product management, cart, wishlist, coupons, orders, and payments.
 - Added advanced features like search, pagination, file uploads, and Stripe checkout.
 - Improved performance using MongoDB aggregation pipelines & database indexing.
 - Tools: Node.js, Express.js, MongoDB, Mongoose, Cloudinary, Stripe, JWT, Multer, RESTful API.
- **EasyEat Platform (FrontEnd)** [Demo](#) | [GitHub Link](#)
 - EasyEat is a Food E-Commerce Platform featuring a responsive interface with Home, Shop, Product Details, Cart, and Wishlist pages, plus dynamic filtering and an optimized cart system for better performance.
 - Improved load time by 25% using efficient state management with Redux Toolkit.
 - Tools: React.JS, JavaScript, Tailwind CSS, Redux Toolkit, Context Api, RESTful Api, HTML, CSS.

SKILLS

Programming Languages: C/C++, Java, JavaScript, TypeScript, SQL

Web Development HTML, CSS, React.js, Next.js, Tailwind CSS, Redux Toolkit, Bootstrap, Sass, RESTful API

Backend Development: Node.js, Express.js, MongoDB, SQL Server, Mongoose, Prisma

Software Development Concepts: Object-Oriented Programming (OOP), Algorithms and Data Structures (DSA), Clean Code, Clean Architecture, Design Patterns

Tools & Workflow: Git & GitHub, Figma, Adobe XD, Adobe Photoshop, Agile/Scrum

Volunteering

- **Mentor and Instructor Problem Solving | ICPC Community Zagazig | October 2022 – Present**
 - Mentored teams in competitive programming through weekly upsolve sessions covering STL, Binary Search, and Greedy.
 - provided feedback to trainees to enhance their competitive programming skills.
- **Head Track Front-End Development IEEE | Zagazig | October 2022 – September 2024**
 - Led a team in creating user-friendly websites, managing materials, and overseeing quality to ensure smooth project execution.
 - Reviewed tasks and provided feedback, guiding team members on completed projects to enhance overall performance.

LANGUAGES

- **Arabic:** (Native speaker)
- **English:** Intermediate – Conversational in technical discussions and team collaboration.
